

FREDERYCO MIGUEL MUNIZ BELÉM

Senior Backend Developer | PHP & Laravel Specialist | Java & Spring Boot | C# & .NET | REST APIs | PostgreSQL | Node.js | Docker | AWS
Palmas, TO, Brazil · frederycomiguel@gmail.com · github.com/frederycomiguel · linkedin.com/in/frederyco-miguel-m-78789847

PROFESSIONAL SUMMARY

Senior Backend Engineer with 13+ years of experience designing and evolving critical production systems, with strong expertise in API architecture (REST and SOAP), distributed integrations, and relational databases (PostgreSQL, Oracle, MySQL, SQL Server). Hands-on experience with Node.js, Java & Spring Boot, AWS (S3, Lambda, EC2), Terraform, Docker, and Kubernetes fundamentals, as well as asynchronous processing (queues) in high-demand environments. Autonomous in architecture decisions, legacy system modernization, and microservices migration, with measurable performance and availability results. Advanced use of AI tools in the development workflow (Claude Code, orchestration of multiple specialized agents) and architecture of production AI integrations — MCP (Model Context Protocol) servers and automations via the Claude API. Experience in technical leadership, mentoring, and agile practices (Scrum).

KEY RESULTS

- +40% API performance through optimization with Docker and CI/CD
- Architected an MCP (Model Context Protocol) server and a sync tool (Node.js + Claude API) that eliminates manual rework between Azure DevOps and SharePoint, with a 3-layer fallback (GitLab API → free-text extraction via AI → Teams alert)
- Hemominas SGPR system (Laravel/Oracle) processing 10M+ records per year with complex relational database integration
- Magento e-commerce supporting seasonal peaks of 1,000+ requests/second

PROFESSIONAL EXPERIENCE

Senior Software Developer — Montreal Official | Remote

May 2024 — Present

- Developed backend services and REST APIs for client FonteCred, using PHP (Laravel) and PostgreSQL in a fully remote environment
- Worked on the IPSEMG project (healthcare) with Laravel, MySQL, Next.js, and React.js, integrating front-end and backend in a critical management platform
- Actively participated in code reviews and developer mentoring within the team
- Architected and implemented an MCP (Model Context Protocol) server integrating Azure DevOps and GitLab, along with an automation tool using the Claude API for data extraction and eliminating repetitive manual work in the team's workflow
- Docker, CI/CD (GitLab/Bitbucket), and automated testing, reducing deployment time by 40%
- Implemented SOAP Web Services for integration with legacy healthcare systems
- Stack: PHP (OOP/Laravel), Node.js, PostgreSQL, Docker, React.js, Swagger, GitLab CI/CD, MCP (Model Context Protocol), Claude API

Senior Software Engineer — Stefanini Brasil | Remote

Sep 2022 — Dec 2023

- Developed the SGPR module for Fundação Hemominas (healthcare) in PHP/Laravel with Oracle/MySQL integration and scalable architecture for 10M+ records
- SOAP Web Services and REST APIs documented with Swagger/OpenAPI for hospital system integration
- Oracle integration with index optimization — 60% reduction in query time
- Vue.js, Bootstrap, Docker integrated with CI/CD (GitLab) and automated testing
- Stack: PHP (OOP/Laravel), Oracle, MySQL, Vue.js, Bootstrap, Docker, Swagger, GitLab CI/CD

Development Analyst III — JN2 E-Commerce Expert | Brazil

Jul 2021 — Aug 2022

- Developed and maintained Magento stores (mid/large clients) with PHP (OOP), MySQL, focused on performance and conversion
- Magento 1.9: custom features in PHP (OOP), MySQL, HTML5, CSS3, jQuery
- AWS (S3), Terraform, Docker, Bitbucket CI/CD ensuring consistent deployments
- Supported seasonal campaigns in collaboration with marketing/product teams
- Stack: PHP (OOP/Magento), MySQL, HTML5/CSS3, jQuery, AWS, Terraform, Docker

Web Developer (incl. Tech Lead) — CRP Tecnologia | Palmas, TO

Feb 2018 — Jul 2021

- Developed web applications in PHP (OOP: Laravel, Smarty, WordPress) and C# (.NET/Umbraco) for public and private clients. Served as Technical Lead of the outsourcing team from Jul to Dec 2020.
- Tech Lead (Jul–Dec 2020): main point of contact for the outsourcing team, adopted Scrum ceremonies (Daily, Planning, Retrospective) and structured feedback
- Built and maintained REST APIs and SOAP Web Services with CRM integration and relational databases (SQL Server, MongoDB)
- API documentation with Swagger/OpenAPI and automated testing
- SQL Server, MongoDB, Docker, Azure, Cloudflare across various projects
- Stack: PHP (OOP/Laravel, Smarty, WordPress), C#/.NET (Umbraco), SQL Server, MongoDB, Docker, Azure, Cloudflare

Web Developer — ArtemSite Agência Digital | Palmas, TO

Sep 2015 — Jan 2018

- Backend development of websites and portals in PHP (OOP: Smarty, WordPress), MySQL, and Bootstrap
- System integration and internal workflow automation with object-oriented PHP
- Docker, GitHub, jQuery, JavaScript across various projects
- Stack: PHP (OOP/WordPress, Smarty), MySQL, Bootstrap, jQuery, Docker, GitHub

Intern — DIX BPO | Palmas, TO

May 2014 — Apr 2015

- Built an institutional website with HTML5 + Bootstrap
- Integrated TOTVS system via APIs/ADVPL

Intern — CREA-TO | Palmas, TO

Jun 2012 — May 2014

- Institutional portal in PHP 5 + MySQL + Bootstrap with basic OOP
- First projects using Git and version control

TECHNICAL SKILLS

Languages: PHP (OOP), Node.js, Java, C#, JavaScript, Python (developing), HTML5, CSS3, SQL, Bash

Frameworks & CMS: Laravel, Symfony, Spring Boot, .NET, Next.js, React.js, Vue.js, Magento, WordPress, Smarty, Umbraco

Frontend: Bootstrap, jQuery

Databases: PostgreSQL, Oracle, MySQL, MongoDB, SQL Server

DevOps & Cloud: AWS (S3, Lambda, EC2), Docker, Kubernetes (fundamentals), Terraform, CI/CD (GitLab, Bitbucket), Azure, Cloudflare

Async Processing: Queues and asynchronous processing, event-driven integrations

AI & Automation: Claude Code, Claude API, MCP (Model Context Protocol), orchestration of multiple specialized agents, LLM-based workflow automation

APIs & Standards: REST, SOAP, XML, OpenAPI/Swagger, Microservices, TDD

Tools: Git, GitHub, PhpStorm, Postman, Linux, Nginx, Apache, TOTVS/ADVPL

EDUCATION

Postgraduate — Specialization in Software Development with DevOps Practices — Cruzeiro do Sul Virtual | Aug 2023 – Sep 2024

Bachelor's Degree — Information Technology / Information Systems — UniCatólica | Jan 2012 – Jun 2016

CERTIFICATIONS & COURSES

- DevOps & Software Development Practices — Cruzeiro do Sul Virtual, 2024
- Laravel Advanced Patterns & Best Practices
- Docker & Kubernetes Fundamentals
- AWS Cloud Practitioner (in progress)
- Scrum Foundation Professional Certificate (SFPC) — Certiprof, 2020
- Tech Lead Career: Technical Leadership — Alura, 2024
- AI-Driven Development Workshop — Tech Leads Club, 2026

LANGUAGES

Portuguese — Native • English — Technical (reading and writing)

Resume updated: August 2026
